DETAILS MAKE PERFECTION AND PERFECTION IS NOT A DETAIL

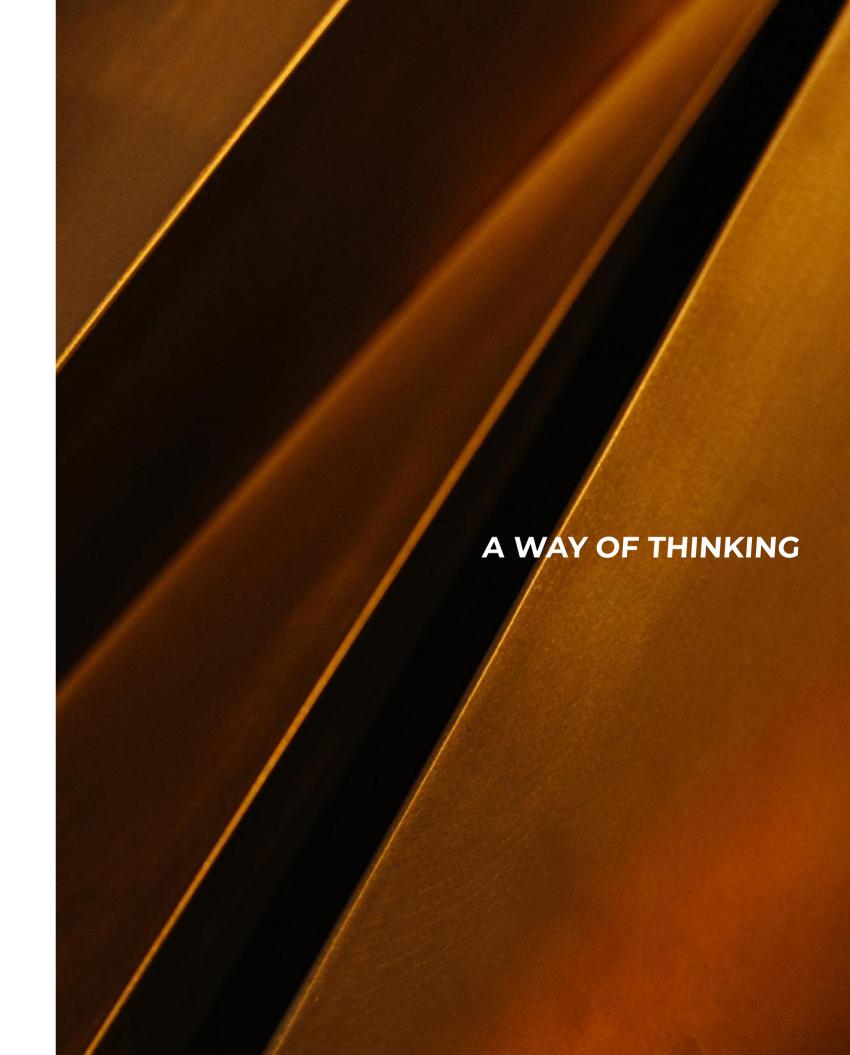

About **Metallo**

Metallo is one of the leading luxury furniture brands with Italian soul and quality specializing in high-end modern and contemporary furniture designs.

Focusing on Italian and egyptian craftsmanship and the finest attention to detail, we produce luxury furniture handcrafted by skilled artisans using only the finest raw materials.

Creating and relating that takes root in a new definition of furniture, metal solutions and design and whose outcome is environments in which objects whose unique style makes them stand out and interact with each other.

Every Metallo product or solution is the outcome of studies and research that aim to create car fully made, long-lasting, top-quality articles. Machines and meticulous manual craftsmanship work hand in hand, guaranteeing even more attention to detail and combining the reliability of industrial processes with the dedication of artisan care.

Over the years, the original spirit behind Metallo's handcrafted work has evolved and matured following a well trodden path in which design innovation is interpreted as a comprehensive overall process and not simple technological renewal.

At Metallo, we specialize in creating custom metal works for your spaces that seamlessly blend functionality, durability, and aesthetic appeal.

The Power of CNC in Metal Fabrication

The Benefits of CNC Machining for Metal Fabrication

Metal fabrication is a complex process that involves cutting, shaping, and assembling metal parts to create various products.

Traditional manual machining methods can be time-consuming and labor-intensive, resulting in variations in the finished product.

cnc machining has revolutionized metal fabrication, offering numerous benefits over traditional methods. Let's take a closer look at some of the specific benefits of CNC machining for metal fabrication processes.

CNC TECHNOLOGY

Improved accuracy in metal fabrication processes

One of the most significant benefits of CNC machining in metal fabrication is the improved accuracy it offers. CNC machines can produce parts to exact specifications every time, with a level of precision that is impossible to achieve manually.

This accuracy ensures that the finished product is of the highest quality and meets our customer's exact requirements.

WE HAVE THE ABILITY TO PRODUCE COMPLEX SHAPES AND DESIGNS

Metal fabrication is a complex process that involves cutting, shaping, and assembling metal parts to create various products. Traditional manual machining methods can be time-consuming and labor-intensive, resulting in variations in the finished product.

CNC machining has revolutionized metal fabrication, offering numerous benefits over traditional methods.

Making a metal a basis for innovation.

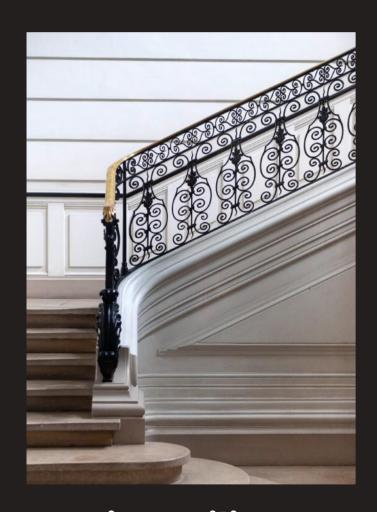

What We Do Raw Metal

The first step of the project in its journey, from design to material: the metal takes shape. Metallo studies the action plan in collaboration with the customer, starting from a design or an inspiration.

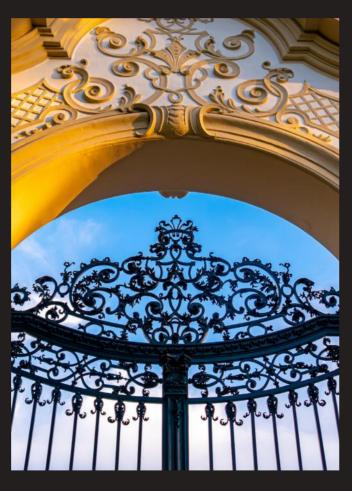

Next, we move on to the creation of the mold and the metal stamping: a complex procedure, managed internally by the department with automated processes, to create the most innovative shapes thanks to advanced technological research.

At Metallo, we specialize in creating Custom Panels and Dividers that allow you to craft your ideal space. Our panels are meticulously crafted with a selection of top-notch materials, including Aluminum Composite, and HDPE which are perfect for using indoor and outdoor, ensuring a robust and lasting product.

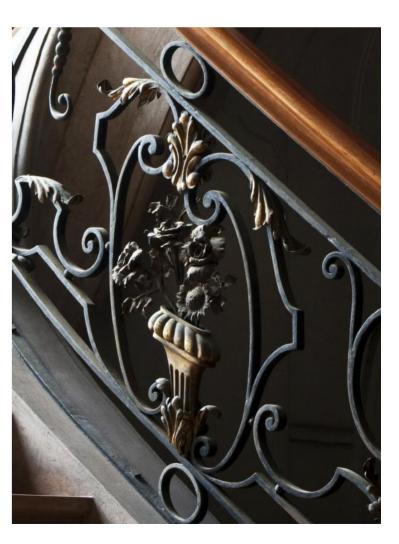

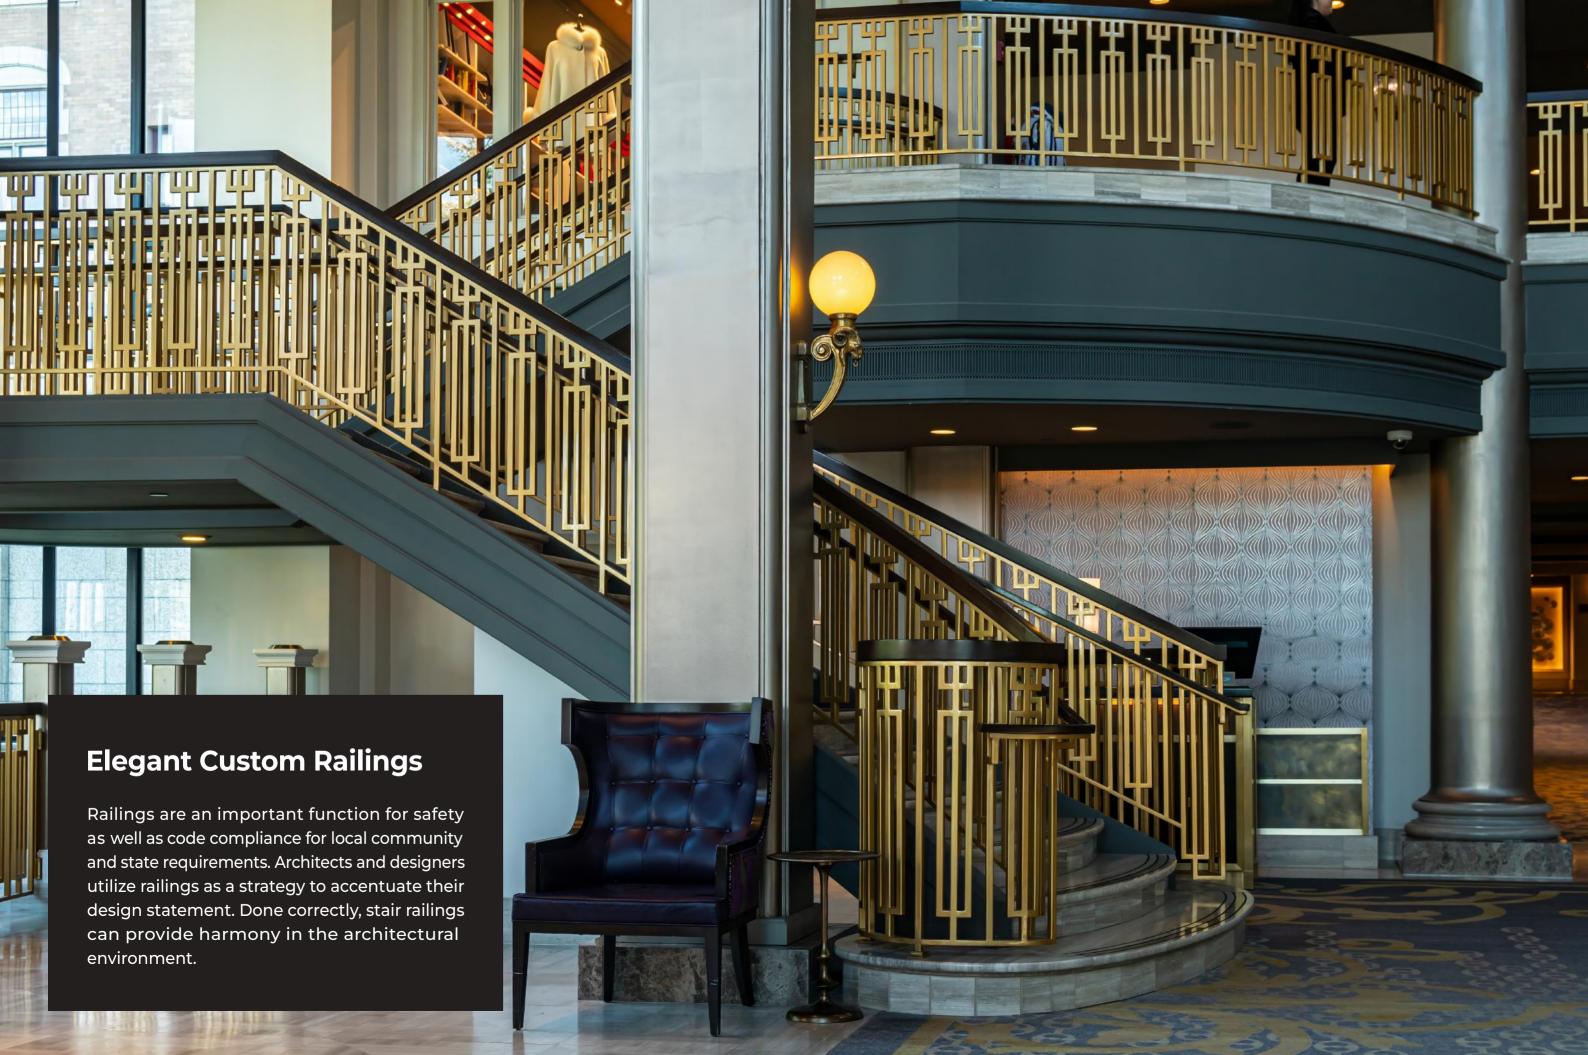

Custom Designs

Wrought iron railings have displayed their owner's personalized expression of taste. Custom railing designs have graced exceptional homes in Middle East, Europe and beyond for centuries.

While design styles ebb and flow, the timelessness and character exuded by metal interior design railings does not compare to any other material in the world. Utilizing iron, stainless, bronze, or aluminum, designers and clients are placing their signature design stamp on interior spaces everywhere; with the duel purpose of providing rigidity to meet building codes and safety to prevent injury.

Metallo luxury coffee table with metal base shown in gold finishing with top in glass. Metal base available in gold or dark bronze finishing. Marble top options: Black and Gold, Bamboo, and Silk Georgette Blue. This luxury modern furniture collection features a chic and adaptive style to any living space.

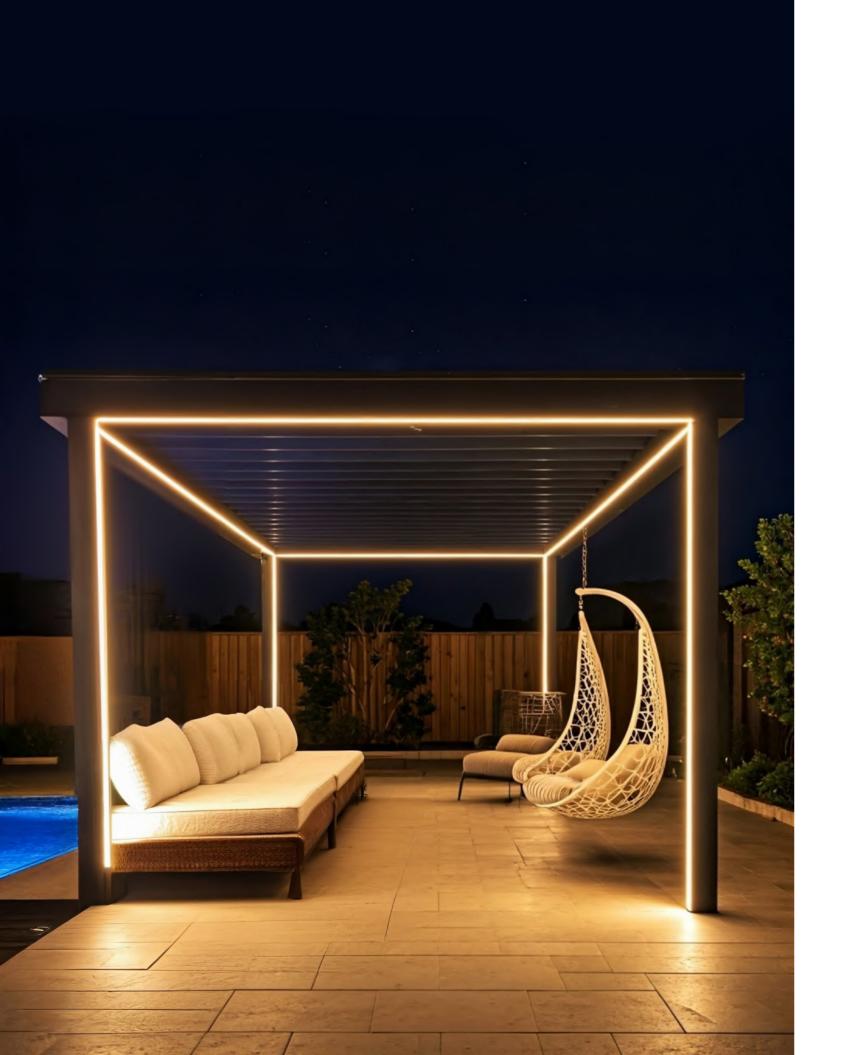

There is certainly a growing interest in certain architectural structures that add a bit of spacial intrigue to properties. For the interior spaces, living areas are sectioned off with glass walls to create visual openness. For exterior areas, living spaces are being expanded as beautiful architectural pergolas are erected over comfortable terraces ... And this is just the beginning of what can be done to elevate the aesthetics of a property.
